1. Introduction

1.1 Purpose

This document specifies the software requirements for the Nykaa Mobile Application, an e-commerce platform for beauty, fashion, and wellness products. This SRS defines functional and non-functional requirements for the mobile application (Android & iOS versions).

1.2 Document Conventions

- REQ-X represents uniquely identified requirements.
- H = High Priority, M = Medium Priority, L = Low Priority.
- All requirements are mandatory unless stated otherwise.

1.3 Intended Audience and Reading Suggestions

This document is intended for:

- Developers
- Project Managers
- Testers
- UI/UX Designers
- Stakeholders

Readers should first review the Introduction and Overall Description sections before proceeding to detailed system features.

1.4 Product Scope

The Nykaa App is an online shopping platform allowing users to browse, search, compare, and purchase beauty and fashion products. The app supports secure payments, order tracking, reviews, and personalized recommendations.

Objectives:

- Provide seamless online shopping experience
- Enable secure digital payments
- Offer personalized product recommendations
- Ensure smooth order tracking and delivery updates

1.5 References

- Nykaa Official Website
- Android & iOS Development Guidelines
- Payment Gateway API Documentation

2. Overall Description

2.1 Product Perspective

The Nykaa App is a standalone mobile application integrated with backend servers, payment gateways, logistics partners, and inventory management systems.

It interacts with:

- Database Servers
- Payment Gateway Systems
- Notification Services
- Delivery Tracking Systems

2.2 Product Functions

The application provides the following major functions:

- User Registration and Login
- Product Browsing and Search
- Wishlist Management
- Shopping Cart Management
- Secure Checkout & Payment
- Order Tracking
- Ratings and Reviews
- Push Notifications
- Personalized Recommendations

2.3 User Classes and Characteristics

1. **Customers**
 - Browse and purchase products
 - Moderate technical knowledge
2. **Admin**
 - Manage products and inventory
 - Manage orders and users
3. **Delivery Personnel**
 - Update order delivery status

2.4 Operating Environment

- Android 8.0 and above
- iOS 13 and above
- Cloud-based backend server
- Internet connectivity required

2.5 Design and Implementation Constraints

- Must comply with digital payment regulations.
- Must follow Google Play and Apple App Store guidelines.
- Secure encryption for payment processing.
- Responsive UI design for various screen sizes.

2.6 User Documentation

- In-app Help Section
- FAQ Section
- Customer Support Chat
- Email Support Documentation

2.7 Assumptions and Dependencies

- Users have stable internet connection.
- Payment gateway APIs are available.
- Delivery services are operational.
- Inventory database is updated in real-time.

3. External Interface Requirements

3.1 User Interfaces

- Clean and user-friendly UI.
- Category-based navigation.
- Search bar with filters.
- Add to Cart and Buy Now buttons.
- Order tracking dashboard.
- Profile management screen.

3.2 Hardware Interfaces

- Smartphone (Android/iOS)
- Camera (for scanning coupons if applicable)
- Internet connectivity (Wi-Fi/4G/5G)

3.3 Software Interfaces

- Payment Gateway APIs (UPI, Credit/Debit Card, Wallets)
- Database Management System
- Notification Service (Firebase)
- SMS Gateway

3.4 Communications Interfaces

- HTTPS Protocol for secure communication.
- Push Notifications via Firebase Cloud Messaging.
- Email Notifications.
- SMS Alerts.

4. System Features

4.1 User Registration & Login

4.1.1 Description and Priority

Allows users to create an account and securely log in.

Priority: High

4.1.2 Stimulus/Response Sequences

User enters credentials → System verifies → Access granted or error displayed.

4.1.3 Functional Requirements

- REQ-1: The system shall allow users to register using email or phone number.
- REQ-2: The system shall provide OTP verification.
- REQ-3: The system shall allow password reset.
- REQ-4: The system shall authenticate users before login.
- REQ-5: The system shall display error messages for invalid credentials.

4.2 Product Browsing & Search

Description and Priority

Allows users to browse categories and search products.

Priority: High

Functional Requirements

- REQ-6: The system shall display products by category.
- REQ-7: The system shall provide search functionality.
- REQ-8: The system shall allow filter and sorting options.
- REQ-9: The system shall display product details (price, description, reviews).

4.3 Shopping Cart & Checkout

Description and Priority

Enables users to add items to cart and complete purchases.

Priority: High

Functional Requirements

- REQ-10: The system shall allow users to add/remove items from cart.
- REQ-11: The system shall calculate total price.
- REQ-12: The system shall support multiple payment methods.
- REQ-13: The system shall confirm order upon successful payment.
- REQ-14: The system shall generate invoice.

4.4 Order Tracking

Description and Priority

Allows users to track order status.

Priority: Medium

Functional Requirements

- REQ-15: The system shall display order history.
- REQ-16: The system shall provide real-time tracking updates.
- REQ-17: The system shall notify users about delivery status.

4.5 Ratings & Reviews

Description and Priority

Allows customers to rate and review products.

Priority: Medium

Functional Requirements

- REQ-18: The system shall allow users to rate purchased products.
- REQ-19: The system shall display user reviews.
- REQ-20: The system shall restrict reviews to verified buyers.

5. Other Nonfunctional Requirements

5.1 Performance Requirements

- App response time shall be less than 3 seconds.
- The system shall handle at least 10,000 concurrent users.
- Payment processing shall complete within 5 seconds.

5.2 Safety Requirements

- Prevent duplicate transactions.
- Automatic rollback for failed payments.

5.3 Security Requirements

- Data encryption using HTTPS.
- Secure storage of passwords (hashed).
- OTP verification for sensitive actions.
- Compliance with data privacy regulations.

5.4 Software Quality Attributes

- High usability.
- High reliability (99% uptime).
- Scalability.
- Maintainability.
- Cross-platform compatibility.

5.5 Business Rules

- Discounts applied as per promotional policies.
- Return policy within specified days.
- Only registered users can place orders.

6. Other Requirements

- Database should support large product inventory.
- System should support future AI-based recommendations.
- Multilingual support may be added in future versions.

Appendix A: Glossary

Term	Description
OTP	One Time Password
UI	User Interface
API	Application Programming Interface
UPI	Unified Payments Interface

Appendix B: Analysis Models

- Class Diagram

- Component Diagram

- Deployment Diagram

- Use Case Diagram

- Activity Diagram

Appendix C: To Be Determined List

- Exact server capacity.
- Final payment gateway integration.
- Final UI design confirmation.
